Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).

```
plot(iris)
```

I am beginning to learn **Quarto**.

1. First
 1. First-one
 2. Frist-second

Figure 1: I love an Elephant

2. Second

3. Third

The Figure 1 is showing an example of an animal.
